Cover latter

Dear,

I am writing to express my interest in the [Software Engineer] position at, as advertised on [Where You Found the Job Posting]. With over two years of experience as a Software Engineer and a strong background in developing scalable and efficient solutions, I am confident in my ability to contribute effectively to your team.

During my tenure at Doublene, USA, I have honed my skills in the complete Software Development Life Cycle (SDLC), working extensively with Agile/Scrum methodology. My role involved designing, developing, and testing software applications, where I successfully refactored existing code to enhance performance, scalability, and reliability. I developed the UI using JSP, HTML, CSS, and JavaScript, and was responsible for SQL and T-SQL query development, as well as creating workflows in Databricks and automating tasks with shell scripts. My contributions have notably improved application performance and reduced manual testing hours through the implementation of automated unit and integration testing.

Previously, at TeCoventry, India, I focused on building RESTful APIs using Java and Spring Boot, and implemented a microservices architecture to enhance the scalability and maintainability of our systems. My experience with React.js and core Java principles enabled me to develop dynamic user interfaces and robust server-side components. By actively participating in code reviews and CI/CD pipeline setup using Jenkins and GitHub, I helped reduce critical bugs by 15% and improved system response times by 30%.

My academic projects, such as the development of a Password Management System using JavaFX and a Hospital Management System with Java and NetBeans, underscore my ability to deliver secure and functional software solutions. Additionally, my work on a custom cryptocurrency utilizing blockchain technology demonstrates my capability to innovate and implement cutting-edge technologies.

I am particularly drawn to because of [specific reason related to the company, e.g., its innovative approach to technology, its commitment to sustainability, its industry leadership]. I am eager to bring my expertise in Java, Python, JavaScript, and my proficiency with various databases and tools to your team, contributing to your projects and achieving excellence together.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the needs of your team. Please feel free to contact me at +1 (646) 920-4978 or via email at akshithakamshetty8@gmail.com to schedule an interview.

Sincerely,

Akshitha Kamshetty
